

MESSAGE

from

The School Boards of Newfoundland and Labrador

Everyday when we drive along by our public schools we are reminded that education is all about teaching and learning. During this 2007 provincial election campaign, when candidates ask you for your vote, ask them about their views on the importance of public education. Our five School Boards are committed to improving our school system; we ask you to ensure that public education remains a top priority for provincial policy over the years ahead. Let's make certain that today's public education system can prepare them adequately for this challenge.
